

Documentation updating V9.1 to V10

1 - Recovery

- Download the archive present at this url:
<https://www.script-pag.com/docs/V10/V10Update.zip>

2 - Backup

- Make a copy of your following directories on a hard drive:
 - includes/cache/
 - invoices
 - rss
 - upload
- Make a copy of your « includes/configuration.php » file.

3 - Upload

- Upload the new version 10, avoiding overwriting the directories and the file communicated in point n°2.
- Put back your directories and the configuration file from point n°2 if you have overwritten the directories and the file, and check the writing rights on the directories.

5 - Database

- Execute in your database the file « V10Update.sql » of the zip « V10Update » that you previously downloaded.

6 - .htaccess

- Copy/paste the content of the « .htaccessBASE » file found in the « V10Update » zip into your « .htaccess » file, and rename <https://www.domaine.fr> by your domain name.
- If you have IONOS hosting, copy/paste the contents of the « .htaccessIONOS » file.

6 - Caches

- Rebuild all your caches by making a « fake » modification:
 - Main settings
 - SEO settings
 - Google API settings
 - Facebook API settings
 - Invoicing settings
 - Languages
 - Regions and counties
 - Categories et subcategories
 - Subcategories options
 - Form fields
 - Payment modules
 - Ad payment

- Visual options
- Picture options
- Video option
- Account package subscription
- Shop subscription
- Purchase of credit
- Discount code
- Edit automatic email generation
- Contact form
- Pages
- Advertisement
