

Documentation updating V10 to V11

1 - Note

- In this update, the replacement of the contents of the "admin" folder is total.
- You don't need to apply stitches in detail to your original files, just replacing the file is enough! Only on your files with custom edits, the detail points should apply.
- The PayPal payment system now uses the new PayPal Checkout system, the module configuration will have to be re-edited.
- You will have to re-edit your automatic emails if you do not want the original texts.
- The implementation of a language pack (see point n°3) must be carried out after completing the implementation of V11
- The execution of the update file (see point n°4) must be carried out after having implemented the new files of V11

2 - The big news

- Improvement of the administration interface
- New PayPal Checkout system
- New upload system (multi-upload)
- GDPR Cookies Block
- Management of personal data (right to be forgotten GDPR)
- Russian language
- Arabic language
- Right to Left style management for the Arabic language
- How Facebook connect works with accounts without an email address
- Relaunch of purchases pending payment
- Possibility of having decimals and negative values in the digital options
- Possibility to deactivate the options of subcategories like filter of the search engine
- Possibility to add a comment to the sub-category options to differentiate options with the same name
- Automatic e-mails, pages and newsletter editing with CKeditor

3 - Language pack

- You can get the Arabic language pack at the following link : <https://www.script-pag.com/docs/V11/arabic.zip>
- You can grab the Russian language pack from the following link : <https://www.script-pag.com/docs/V11/russian.zip>

4 - Running the update file to update SQL tables

- Get the « exUpdateV11.php » file at the url <https://www.script-pag.com/docs/V11/exUpdateV11.php.zip>, place it at the root of your hosting and run it by going to its url, ex : <https://www.votre-site.com/exUpdateV11.php>.

5 - CSS modification in template/css/design.css file

- Modification of « break-all » by « break-word » on the class « .ad-page-bloc-infos p »
- Replacement and addition of classes in the « /* ----- COOKIES ----- */ » block
- Deactivation of the datepicker classes at the class « #ui-datepicker-div »

- Added « :not(script) » to the class « .bloc-advertisement-area > *:not(div) » : « .bloc-advertisement-area > *:not(div):not(script) »
- New class « .forms > form p.pseudo-display »
- New class « paypal-buttons-context-iframe »
- New class « ad-page-bloc-infos.stats »
- New class « .ad-page-bloc-infos aside p.result_ad_opt »
- Modification of the « .ad-page-bloc-infos aside p » class by the « .ad-page-bloc-infos aside p.title_ad_opt » class
- Modification of the « .text-page p » class by the « .text-page p, .text-page > div, .text-page-ckeditor » class
- New class « #billing-result.billing-display »
- Modification of « #edit-billing » class
- Added « #edit-billing » class in « @media (max-width: 768px) »
- Set z-index to 101 on the « .header » class
- Replacement and addition of classes in the « /* upload */ » block
- For the template « Pagazura » and « Pagocrey », pass the height to 500px on the class block « .background-ads-listing-disc, .background-ads-listing, .background-shops-listing, .background-search-listing »

6 - Modification in the files of the « template » folder

- template/css/rss.xml :
 - Complete file modification
- template/css/rtl.css :
 - New file
- template/tpl_acc_pads.php :
 - Modification of the condition « <?php if(!empty(\$pack) : ?> » by « <?php if(!empty(\$pack) && ((\$nb_ads > 0 || \$limit_2 == 0) && (\$days_pack > 0 || \$limit_1 == 0))) : ?> »
 - Modification of the condition « <?php if(\$limit_shop != 0 : ?> » by « <?php if(\$limit_shop != 0 && \$days_pack_shop > 0) : ?> »
 - Addition of the code for the « <?php elseif(!empty(\$time_pack_shop) && \$limit_shop == 0) : ?> » condition
- template/tpl_form_acc_conn.php :
 - Modification of the condition « <?php if(\$param_api_fb['active_fb'] == '1') : ?> »
- template/tpl_form_acc_crea.php :
 - Modification of the condition « <?php if(\$param_api_fb['active_fb'] == '1') : ?> »
 - New part of code for the pseudo
- template/tpl_form_acc_data.php :
 - New part of code for the pseudo
- template/tpl_form_acc_shop.php :
 - Modification of the « <form> » tag
 - Removed the line « <div id="upload_photo_wrap"></div> »
 - Adding the new upload code to line 14
 - Removal of the old upload code at the end of the fileModification of the condition « <?php if(\$param_api_gg['activ_gg_map'] == 1) : ?> »

- template/tpl_form_deposit.php :
 - Modification of the « <form> » tag
 - Replacement of the line « <div id="upload_file_wrap"<?php if(\$upload_doc == 0) echo ' style="display:none;"; ?>></div> » by the code of comment « //Files uploader »
 - Replacement of the line « <div id="upload_photo_wrap"></div> » by the code of comment « //Photo uploader »
 - Removal of the code from the comment « //Files form »
 - Removal of the code from the comment « //Photos form »
 - Modification of the conditions « <?php if(\$param_api_gg['activ_gg_map'] == 1) : ?> »
 - Addition of the code on the verification of prohibited keywords and modification of the code at the name and email level

- template/tpl_form_update.php :
 - Modification of the « <form> » tag
 - Replacement of the line « <div id="upload_file_wrap"<?php if(\$upload_doc == 0) echo ' style="display:none;"; ?>></div> » by the code of comment « //Files uploader »
 - Replacement of the line « <div id="upload_photo_wrap"></div> » by the code of comment « //Photo uploader »
 - Removal of the code from the comment « //Files form »
 - Removal of the code from the comment « //Photos form »
 - Addition of the input type="hidden on the status
 - Modification of the conditions « <?php if(\$param_api_gg['activ_gg_map'] == 1) : ?> »
 - Addition of the code on the verification of prohibited keywords and modification of the code at the name and email level

- template/tpl_layout.php :
 - Addition of the code of the condition « if(\$_SESSION ['code_lang'] == 'ar') » for the display of the RTL css for the Arabic language
 - Addition of the condition « if(file_exists('template/map/map.php')) » for the display of the css map
 - Adding the code above the closing of the tag « </head> »
 - Modification of the condition « <?php if(!empty(\$param_api_gg['analytics_gg_script'])) : ?> »
 - Removed the code from the condition « if(!isset(\$_COOKIE["valid_cookies"]) && \$valid_cookies == 0) »
 - Modification of the code in the comment « // Geolocation system »
 - Added new code for cookies at the end of the file
 - Changing the language code in the display of flags

- template/tpl_listing_advertisement.php :
 - Modification of the conditions « if(!empty(\$script)) »

- template/tpl_listing.php :
 - Changing the call and the date and time display
 - New variable « \$price_display »
 - Modification of the conditions « if(!empty(\$script) && \$_SESSION['adv'] == \$_SESSION['count_adv'] »

- template/tpl_page_ad.php :
 - Changing the call and date display

- New variable « \$price_display »
- Modification of the variable « \$comment_date »
- Addition of new conditions at the level of « <div class="share"> »
- Modification of the condition « if(!empty(\$script) »
- Modification of the code in the display of subcategory options
- template/tpl_page_shop.php :
 - Modification of the variable « \$comment_date »
 - Removing the variable « \$rss »
 - Replacement of the code at « //Title of rss feed » by the code of the comment « //Urls router »
 - Addition of new conditions at the level of « <div class="share"> »
 - Modification of condition « if(!empty(\$script) »
- template/tpl_payment.php :
 - Modification of the code in the comment « //Paypal »
 - Modification of the « <div id="billing-result"<?php echo (!empty(\$billing) ? ' style="display: flex;" : ''); ?>> » line
- template/tpl_rss_feed.php :
 - Complete file modification
- template/tpl_search.php :
 - Modification of conditions « if(!empty(\$script)) »
- template/tpl_txt.php :
 - Transformation of the « p » tag into a « div » tag

13 - Update detail

- includes/cache/all_cache.php :
 - Added call for new cache files: « includes/cache/cache_blacklist_keywords.php » and « includes/cache/cache_paypal_currency.php »
- includes/cache/cache_pay_paypal.php :
 - Total modification
- includes/cache/cache_mails_auto.php :
 - Total modification
- includes/calendar/fns_calendar.php :
 - Modification of the « calendar_form » and « cal_show » functions
- includes/calendar/fns_js_cal.js :
 - Addition of the variable « BASEURL » in the three places
 - Modification of the code in the comment « //Set date form »
- includes/display/valid_cookie.php :
 - Total modification
- includes/language/ :
 - New variable « account_form_pseudo », « account_form_pseudo_display », « account_form_shop_info_pack5 », « form_message_keywords » and the variables of the comment « //Legal text info cookies »
 - Suppression des variables « form_info_file2 » et « form_info_file3 »
 - Modification des variables « form_info_picture7 » et « form_info_file7 »
- includes/all_fns.php :
 - Modification of the comment « ///Managing the language call »
 - Removal of the code from the comment « ///Creating cookie legal message »
 - Addition of the code of the comment « ///Delete ScriptPAG V10 valid_cookies values »
- includes/fns_data.php :
 - Modification of « name_cat », « name_reg », « name_county », « get_uri » and « rewriting » functions
 - New functions « get_date », « get_hour » and « is_allowed_cookie »
- includes/fns_form.php :
 - New variable « \$display » with modification of the variable « \$value » with the function « number_format » in the fonction « display_digital »
- includes/fns_mail.php :
 - Modification of « spmail » function
 - Addition of the « send_reminder_purchases » function
 - Addition of the « htmlspecialchars_decode » function at the variable « \$message_mail » of the following functions : send_confirm(), send_confirm_acc(), send_payment(), send_expired_ad(), send_unvalidate_ad(), send_expired_visuals_opt_ad(), send_expired_visuals_opt_shop(), send_expired_pack_acc(), send_expired_pack_shop(), send_revival_ad(),

send_reminder_purchases(), send_marketing_ads(), send_account_search(),
send_validate_ad(), send_reject_ad(), send_validate_acc() et send_reject_acc()

- includes/fns_search.php :

- New variable « \$display » with modification of the variables « \$val_digital » in the function « display_select_digital »
- Modification of the « display_search_regions » function
- Addition of the new variable « \$onsearch » in the « display_select_digital », « display_select_data » and « display_select_checkbox » functions

- includes/fns_sql_adm.php :

- Addition of the line « use Spipu\Html2Pdf\Html2Pdf; » at the beginning of the file
- Removal of the following functions : « delete_all_admin_acc », « validate_all_acc », « reject_all_acc », « delete_all_acc », « validate_all_ads », « reject_all_ads », « delete_all_ads », « delete_all_reg », « delete_all_counties », « delete_all_cat », « delete_all_shops », « delete_all_purch », « delete_all_visual_opt », « delete_all_pack_acc », « delete_all_pack_shop », « delete_all_credits », « delete_all_discount_code », « delete_all_invoices », « delete_all_contact », « delete_all_page », « delete_all_opt_cat », « delete_all_values », « delete_all_field », « validate_all_comment_ads », « validate_all_comment_shops », « delete_all_comment_ads », « delete_all_comment_shops », « validate_all_comment_shops » et « delete_all_advertisement »
- Modification of the following functions : « delete_county », « delete_cat », « delete_invoice », « get_invoices_adm », « get_shops », « get_ads », « get_accs », « get_comments_ads », « get_comments_shops », « export_xml_file », « create_xml_doc », « import_xml_ads », « update_acc », « create_cache_val_digital », « get_purchs », « create_opt_cat », « create_cache_opts_cat », « create_cache_mails_auto », « update_opt_cat », « delete_acc », « delete_shop », « delete_ad_adm », « delete_purch », « newsletter », « create_page », « update_page », « create_cache_pay_others » and « create_cache_pay_paypal »
- New functions « create_cache_blacklist_keywords », « search_user_data », « delete_user_data », « update_htaccess » and « export_user_data »
-

- includes/fns_sql_global.php :

- Modification of the « delete_rejected_ads » and « get_info_member » functions
- Addition of the « reminder_purchases » function

- includes/fns_sql.php :

- Modification of the « validate_purch », « register_ad », « create_account », « facebook_conn », « update_account », « get_shop », « create_shop » and « update_ad » functions

- js/functions_js.js :

- Move the line « var minWithPopup = 400; » at the top of the file
- Modification at the comment « //Manage billing form submission »
- Modification at the comment « //Dialog Box Object definition »
- Modification at the comment « //Deposit photos form »
- Addition of the code at the comment « //Display information for cookie utilisation »
- Removal of the code from the comments « //Deposit files form » and « //Shop logo form »

- Added line « Object.defineProperty(Object.prototype, 'toQueryString', {value: toQueryString, writable: false, enumerable: false}); »
- Addition of the code at the comment « //Object.prototype function : Transform object to string param=value »
- Addition of the code at the comment « //String.prototype function : Return a front link with domain name if no domain name »
- js/geolocalisation-depot.js :
 - Modification of the « else » on line 111
- xml/example.xml :
 - Total modification
- acc_connexion.php :
 - Modification of the condition « if(\$param_api_fb['active_fb'] == '1' »
- acc_created.php :
 - Adding the error code for the pseudo
 - Modification of the condition « if(\$param_api_fb['active_fb'] == '1' »
- acc_data :
 - Adding the error code for the pseudo
- acc_logout.php :
 - Total modification
- acc_shop.php :
 - Added code « require_once __DIR__.'../includes/functions/uploader/uploadManager.php'; » at the beginning of the file
 - Removal of the code from the comment « //Get session logo »
 - Addition of code in the comment « //Validation of data »
 - Modification of the code of the comment « //Create the shop »
 - Modification of the condition « if(\$param_api_gg['activ_gg_map'] == 1 && empty(\$_POST['address'])) » and of the condition « if(\$param_api_gg['activ_gg_map'] == 1 && (empty(\$_POST['lat']) || empty(\$_POST['lng']))) »
- ad_deposit.php :
 - Addition of line « require_once __DIR__.'../includes/functions/uploader/uploadManager.php'; » at the beginning of the file
 - Modification of the code of the comment « //Check sessions »
 - Removal of the code from the two comments « //Destroying the photo session »
 - Removal of the code from the two comments « //Destroying the files session »
 - Modification of the code of the comment « //Price of the photo pack »
 - Modification of the code line of the comment « //Registration of the ad »
 - Adding variables to the comment « //Initializing variable \$error »
 - Addition of code at the end of the code of the comment « //Validation of data »
 - Addition of code at the beginning of the second comment « //Registration of the ad »
 - Modification of lines « preg_match("#^[0-9]+\$#", \$_POST['digital_'.\$id_cat_opt_digital]) != true » by « !is_numeric(\$_POST['digital_'.\$id_cat_opt_digital]) »

- Modification of the condition « if(\$param_api_gg['activ_gg_map'] == 1 && empty(\$_POST['lat']) || empty(\$_POST['lng'])) »
 - Addition of the part of code at the level of the variable « \$keywords »
 - Modification and change of location of the variable « \$m_name »
 - Replacement of the 4 lines of code and the comment at « //Create RSS feed » by « // Check action deposit »
- ad_page.php :
 - Modification of the code line of the comment « //Get ad comments »
- ad_update.php :
 - Addition of line « require_once __DIR__.'includes/functions/uploader/uploadManager.php'; » at the beginning of the file
 - Removal of the code from the « //Files » comment
 - Removal of the code from the « //Pictures » comment
 - Modification of the code of the comment « //Price of the photo pack »
 - Addition of the code for the new comment « //Files »
 - Addition of the code of the comment « Image »
 - Modification of the line when calling the « update_ad » function
 - Addition of code at the end of the code of the comment « //Validation of data »
 - Addition of the code of the comment « //Format file and photo »
 - Modification of lines « preg_match("#^[0-9]+\$#", \$_POST['digital_'.\$id_cat_opt_digital]) != true » by « !is_numeric(\$_POST['digital_'.\$id_cat_opt_digital]) »
 - Modification of the condition « if(\$param_api_gg['activ_gg_map'] == 1 && empty(\$_POST['lat']) || empty(\$_POST['lng'])) »
 - Addition of the part of code at the level of the variable « \$keywords »
 - Modify the number 0 by the number 2 in the calls of the « get_ad » function
- page.php :
 - Modification at the last two lines
- payment.php :
 - Modification of the code in the comment « //Load billing information »
- rss.php :
 - Total modification
- .htaccess :
 - Modification of the comment code « ### Rewriting index and general urls ### », « ### Rewriting urls ads, shops and page by language ### » and « ### Rewriting urls ads, shops and page without language ### »
